A PRODUCT OF S. BIRLA GROUP

TOUCH AND FEEL
LUXURIOUS CHARM INTO YOUR
BATHROOM

Faucet Technology

AOSIS has always believed in the power of innovation. Innovation is what drives technological advancement, leading to quantum leaps forward in functionality and durability. We have a team of people dedicated to developing product ranges that innovate in their form and function. We design products that not only look great but are easy to install, maintain and minimize environmental impact.

Warm Regards,

SHANKAR BIRLA

Managing Director

AOSIS BATH

At **AOSIS**, we understand the enthusiasm that surrounds home maintenance and renovation projects. That understanding is the foundation of our company's mission: to provide the best selection of faucets, shower systems and accessories on the market. Our products are made to match the style of your home; perfect for kitchens and bathrooms alike

We have assembled an unparalleled team of employees and created cutting-edge facilities to design, test, improve and refine our products to meet all your fitting needs, poised to provide beautiful and sophisticated high performance faucets and shower systems.

The **AOSIS** team spares no effort to guarantee the best possible life span and superior quality for the products we offer. Our **AOSIS** products are unique, easy to install and come with a warranty.

AOSIS faucets have been designed for easy installation. Mechanical parts are easily accessible from above the counter, making maintenance and cleaning chores much more straightforward.

We equip all our dual-handle lavatory and bathtub faucets with High Standard ceramic cartridges. This ensures their durability and optimum performance for the system.

Our innovations and know-how are sure to exceed all your expectations.

HOW A COLLECTION IS CREATED.

USING  MASSAUD AS AN EXAMPLE.

COMPLETE IN HOUSE

FAUCET MANUFACTURER

CASTING

we maintain a precise brass composition of 58% copper and 41% zinc. A core shooter machine plays a vital role in achieving even wall thickness

MACHINING

The cast components are brought here to undergo a series of operations, including cutting threads, drilling holes, and creating inlets.

GRINDING

In our Belt Grinding plant, skilled workers use various tools to carefully craft faucets and bathroom accessories, achieving a smooth finish like gold plating. We prioritize precision, cleanliness, and a safe environment for our artisans.

POLISHING

Seasoned artisans employ three abrasive belt types and four cloth buffs, transforming each piece into a gleaming marvel akin to gold plating.

CHROME PLATING

It begins with ultra-sonic cleaning, a ten-minute bath that rids the components of any impurities. Following this, the faucets pass through anodic and cathodic tanks, each taking five minutes, further cleansing and preparing the surface. First, a 10-micron nickel plating is meticulously added in a twenty-minute process. In just one minute, a 2-micron chrome plating is applied, endowing the faucets with their iconic silver sheen.

QUALITY CHECK

To validate the faucet's leak resistance, we employ state-of-the-art water-testing machines. Each faucet is meticulously tested to ensure that it remains watertight, guaranteeing that it will perform flawlessly and deliver water without any unwanted drips or leaks.

A young girl with long, dark brown hair in a single braid is seen from the back, washing her hands at a kitchen sink. She is wearing a white t-shirt with thin blue horizontal stripes. Water is running from a chrome faucet into the sink. The background is a dark, out-of-focus kitchen area.

NOTE

WATER SAVINGS - RESPONSIBLE LUXURY

Cutting-edge water maximisation techniques and the finest ideas make your Aosis experience both responsible and luxurious. You use half the amount of water for twice the amount of fun.

SAVE WATER:

SAVING WATER

The planet has only 3% fresh water and we help you use that smartly, without compromising on user experience. Because our customers deserve the best life has to offer.

Our flow regulators are designed to regulate and control the flow of water to taps and showers without hampering the performance or the design of the product.

Water is for everyone and every drop counts, which means each one of us has to take care of it and save it.
